

# El Grande Barn

## El Grande Barn

650 sq. ft. living space  
studio loft  
2 car garage  
8 ft. ceilings

The El Grande Barn gives you the most usable floor area, with a gambrel style roof, for your dollar. This plan was designed for easy conversion to a residence, home office, or recreation room, and features a full eight-foot high loft ceiling. The panelized loft walls, engineered trusses, and pre-cut rafters ensure ease of construction, while dormers located along the eave line greatly increase the space utilization possibilities.
